

STC STEYR[®]

Bearings from Steyr
Quality from Austria

ABOUT US.

THE COMPANY

The history of STC-Steyr is linked to the former STEYR-factories, which were producing bearings in the Austrian "iron city" of Steyr as early as 1922.

Our success therefore is based upon the experience and the technical knowledge of former top members of the STEYR-Corporation, who founded the STC-Steyr Company in 1989, thus taking the highly traditional name of "Steyr" into a new age.

In addition to its expertise in production, the STC-Steyr Wälzlager Deutschland GmbH has emerged as a distribution center in Berlin. From this location, the brand name "STC-Steyr®" has managed to establish itself as a reliable partner in trade and industry.

As producer of bearings, our high quality standards allow us to meet customer demands and expectations worldwide. We can now proudly look upon a steady client base consisting of OEM's and commercial enterprises. Our top quality products all carry the quality label "made in the EU".

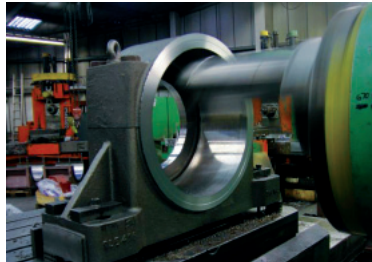

PRODUCTS

Our core expertise lies in the production of bearings for use in large or heavy machinery. Spherical roller bearings, full complement cylindrical roller bearings, ball bearings, housings, slewing rings, as well as special types according to drawings are among our specialties.

PRODUCTION

Using dedicated joint ventures, STC-Steyr has high production capacities - primarily in the European area - at its disposal. In addition, our flexible components purchase policy allows us to realize and implement short notice customer demand promptly. After combining the components, and having passed strict and continuous quality control, a high quality "made in the EU" product leaves our factory. Special types are devised in intensive and constructive cooperation with our customers, with the assistance of our experienced engineers. Initial samples and low volume production are a natural step for us before the customer gives us the go-ahead for serial production.

QUALITY

The STC-Steyr Wälzlager Deutschland is certified in accordance with the DIN EN ISO 9001:2008. Using our quality management system, we regularly monitor the manufacturing sites, as well as assure the compliance with all essential quality characteristics. Certification reports and material quality certificates are documented within the company but can be provided to the customer if requested.

PACKAGING, SHIPPING & HANDLING

Our meticulous selection of certified shipping agencies, in addition to top quality packaging, guarantee a smooth and frictionless delivery and provide for long term and long lasting storage capabilities of our products for the customer. Priority shipping and express deliveries are available on request.

SERVICE

Our distribution center with friendly and competent staff is available and happy to serve our customers. You would like to speak to us in person, at your office or on site? No problem! Our field staff would be happy to pay you a visit. You can reach us under the following phone number: +49 30 3450626-0

TRADE FAIRS

We present our products at international industrial fairs such as the Hannover Messe in Hannover, Germany, the SMM in Hamburg, Germany, or the PTC in Shanghai, China. You can find our current and future trade fair exhibitions on our website at www.stc-steyr.de.

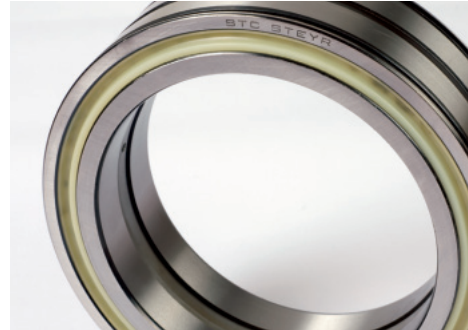

A SELECTION OF OUR PRODUCTS

SPHERICAL ROLLER BEARINGS

FULL COMPLEMENT CYLINDRICAL ROLLER BEARINGS

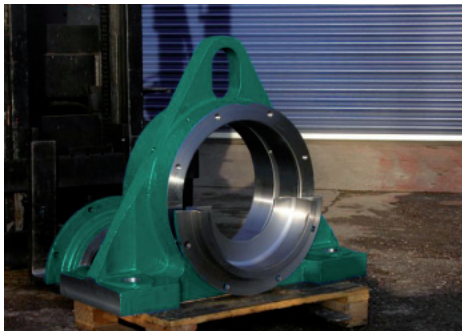

TAPER ROLLING BEARINGS

BALL BEARINGS

HOUSINGS

SLEEWING RINGS

SPHERICAL PLAIN BEARINGS

SLIDING BEARINGS

BALLS

TRACK RUNNER BEARINGS

NEEDLE ROLLER BEARINGS

ROPE SHEAVES IN STEEL & PLASTICS

ADAPTER & WITHDRAWAL SLEEVES

HIGH PRECISION BEARINGS

SUPPORT ROLLERS

BARREL ROLLER BEARINGS

FOUR POINT BEARINGS

CYLINDRICAL ROLLERS

EXAMPLES OF USE

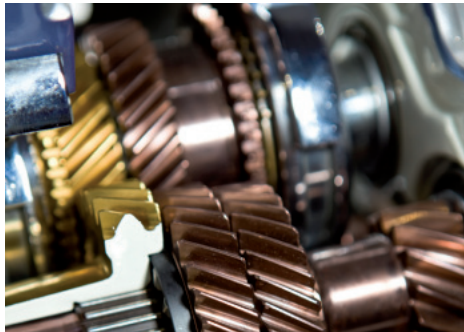

STEEL & ROLLING MILLS

CONVEYANCE

TRANSMISSION MANUFACTURING

CRANE CONSTRUCTION & LIFT TECHNOLOGY

MINING & OPENCAST TECHNOLOGY

CONSTRUCTION & AGRICULTURAL MACHINERY

MARINE & PORT EQUIPMENT

STEEL & HYDRAULIC ENGINEERING
